ROBERTO CORONA TOPANI

Art Director

Atypical and eclectic, specialized in the creation and artistic direction of important international events, such as opening and closing ceremonies, outdoor and indoor events, with work experience gained also in the fields of theater, cinema and television.

I like to emphasize the visionary and emotional side of my work through the non-conventional use of visual and performing arts laid in a context of spectacular settings that are absolutely unique, one of a kind, where the elements become the source of inspiration of a futuristic imagery. The sea, lakes, rivers become the stage for floating creatures that rise from the abyss to dance over the surface of water. I worked in technical design and theater since I was young, thus stepping into diverse career opportunities as an actor, director and creator of very original stage machines, thanks to which I have won several national and international awards.
